Abstract

This specification defines the 5th major version, first minor revision of the core language of the World Wide Web: the Hypertext Markup Language (HTML). In this version, new features continue to be introduced to help Web application authors, new elements continue to be introduced based on research into prevailing authoring practices, and special attention continues to be given to defining clear conformance criteria for user agents in an effort to improve interoperability.

Status of This document

This section describes the status of this document at the time of its publication. Other documents may supersede this document. A list of current W3C publications and the latest revision of this technical report can be found in the <u>W3C</u> <u>technical reports index</u> at http://www.w3.org/TR/.

If you wish to make comments regarding this document in a manner that is tracked by the W3C, please submit them via using <u>our public bug database</u>. If you cannot do this then you can also e-mail feedback to <u>public-html-comments@w3.org</u> (<u>subscribe</u>, <u>archives</u>), and arrangements will be made to transpose the comments to our public bug database. All feedback is welcome.

Work on extending this specification typically proceeds through <u>extension specifications</u> which should be consulted to see what new features are being reviewed.

The bulk of the text of this specification is also available in the WHATWG <u>HTML Living Standard</u>, under a license that permits reuse of the specification text.

The working groups maintains <u>a list of all bug reports that the editors have not yet tried to address</u> and <u>a list of issues for which the chairs have not yet declared a decision</u>. You are very welcome to <u>file a new bug</u> for any problem you may encounter. These bugs and issues apply to multiple HTML-related specifications, not just this one.

Implementors should be aware that this specification is not stable. Implementors who are not taking part in the discussions are likely to find the specification changing out from under them in incompatible ways. Vendors interested in implementing this specification before it eventually reaches the Candidate Recommendation stage should join the aforementioned mailing lists and take part in the discussions.

Publication as a Editors' Draft does not imply endorsement by the W3C Membership. This is a draft document and may be updated, replaced or obsoleted by other documents at any time. It is inappropriate to cite this document as other than work in progress.

The latest stable version of the editor's draft of this specification is always available on the W3C HTML git repository.

The W3C <u>HTML Working Group</u> is the W3C working group responsible for this specification's progress along the W3C Recommendation track. This specification is the 16 June 2013 Editor's Draft.

Work on this specification is also done at the <u>WHATWG</u>. The W3C HTML working group actively pursues convergence with the WHATWG, as required by the <u>W3C HTML working group charter</u>. There are various ways to follow this work at

www.w3.org/html/wg/drafts/html/master/

the WHATWG:

Commit-Watchers mailing list (complete source diffs): http://lists.whatwg.org/listinfo.cgi/commit-watchers-whatwg.org

- Annotated summary with unified diffs: http://html5.org/tools/web-apps-tracker
- Raw Subversion interface: svn checkout http://svn.whatwg.org/webapps/

This document was produced by a group operating under the <u>5 February 2004 W3C Patent Policy</u>. W3C maintains a <u>public list of any patent disclosures</u> made in connection with the deliverables of the group; that page also includes instructions for disclosing a patent. An individual who has actual knowledge of a patent which the individual believes contains <u>Essential Claim(s)</u> must disclose the information in accordance with <u>section 6 of the W3C Patent Policy</u>.
